## ABOUT ME

A motivated engineering student with particular interest in web and mobile app development (Android/iOS). Proficient in front-end technologies like HTML, CSS, JavaScript with a growing interest in back-end development. Eager to contribute to meaningful projects and thrive in a collaborative setting.

---

## KEY COMPETENCIES

Proficient in Java, Python, C/C++, HTML, CSS, JavaScript  
Algorithmic Thinking  
Communication  
Teamwork

---

## ACADEMIC PROJECTS:-

### YouTube Homepage Replica

- Developed a replica of YouTube's homepage using HTML and CSS, focusing on responsive design and user interface elements.
- Implemented features such as navigation bar, search bar and video/profile thumbnails to create a functional and visually appealing webpage.
- Demonstrated proficiency in front-end web development and attention to detail in design and layout.

### Card Workout App (iOS)

- Developed a card-based workout app using Swift, allowing users to shuffle cards and receive exercise prompts based on the card drawn (spades, hearts, clubs, etc.).
- Demonstrated proficiency in iOS development, user interface design, and creative problem-solving.

### Weather API Website

- Developed a responsive weather application using HTML, CSS, and JavaScript, providing users with intuitive access to real-time weather information. Employed JavaScript to create dynamic functionality, allowing users to retrieve weather data based on their location or specified location input. Demonstrated proficiency in web development, user interface design, and innovative problem-solving techniques to deliver a seamless and visually appealing weather experience.
